

Heritage Treasures: An In-Depth Analysis of
UNESCO World Heritage Sites in Tableau

TEAM ID	SWTID-2026-4638
PROJECT TITLE	Heritage Treasures: An In-Depth Analysis of UNESCO World Heritage Sites in Tableau.
MAX MARKS	3 MARKS

6.4 – Dashboard

DASHBOARD 1 :Heritage Overview Panel

This is how you make the Heritage Overview Panel. You need to put a column on the left side of the screen. This column will have two things: a bar chart that shows categories and a line chart that shows what will happen in the future. On the side of the screen you will have a big space for your maps and bubble views.

Step 1: Get the Canvas Ready

- Click the New Dashboard button at the bottom of the screen. It looks like a grid. Is next to your worksheet tabs.
- Look at the side of the screen and find the Size settings. Change the menu to Desktop Browser. This will make your layout look good on a computer screen.
- Make sure the toggle button at the left is set to Tiled.

Step 2: Make the Left Column

Heritage Treasures: An In-Depth Analysis of UNESCO World Heritage Sites in Tableau

- Find the categories by site count chart. Drag it to the empty canvas. It will fill the screen.
- Find the year forecasting chart. Drag it to the bottom of the categories chart. Wait until you see a box then let go of the mouse.
- Now you have a column on the left side of the screen with two charts.

Step 3: Add the Main Right Column

- Find the Top 10 Regions by Area map. Drag it to the right side of the screen. Wait until you see a line then let go of the mouse.
- This will split the screen into two parts: a left column and a wide right column.
- You now have a space for your maps and bubble views.

Step 4: Add Charts

- Find the sites count per region chart and drag it to the side of the Top 10 Regions by Area map. This will split the right part of the screen into two charts.
- Find the countries per region chart. Drag it to the bottom of the map. This will add another chart to the screen.

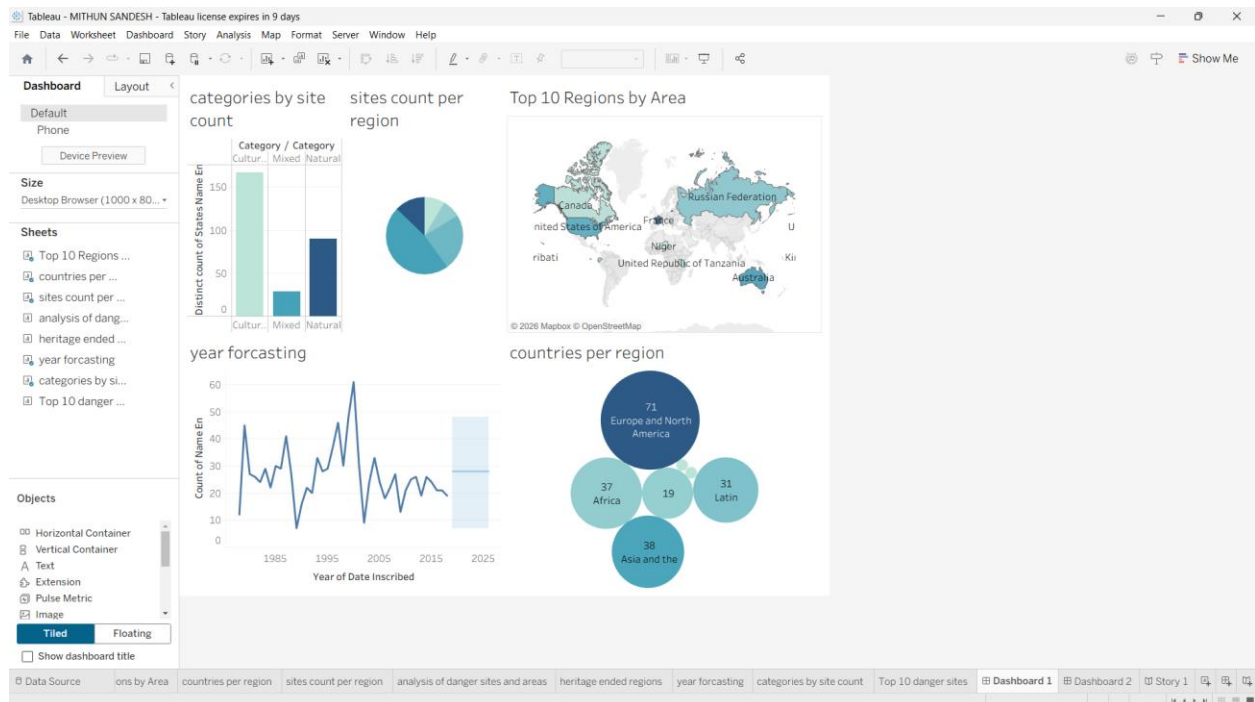

Step 5: Make the Charts Look Good

- Look at the side of the screen and find the color legends. Click on each one. Remove it from the dashboard. This will make the screen look cleaner.

Heritage Treasures: An In-Depth Analysis of UNESCO World Heritage Sites in Tableau

- Now your Heritage Overview Panel is ready.

OUTPUT

DASHBOARD 2: Danger Analysis Panel

This is how you make the Danger Analysis Panel. You need to split the screen into two parts: one for your maps and one for your charts.

Step 1: Get the Canvas Ready

- Click the New Dashboard button at the bottom of the screen.
- Find the Size settings. Change the dropdown menu to Desktop Browser.

Heritage Treasures: An In-Depth Analysis of

UNESCO World Heritage Sites in Tableau

- Make sure the toggle button at the left is set to Tiled.

Step 2: Make the Columns

- Find the heritage ended regions map. Drag it to the empty canvas.
- Find the analysis of danger sites and areas chart and drag it to the side of the map. Wait until you see a line then let go of the mouse.
- Now you have two columns on the screen.

Step 3: Add the Treemap

- Find the 10 danger sites treemap and drag it to the bottom of the heritage ended regions map.
- Tableau will put it underneath the map filling the bottom left part of the screen.
- You now have a treemap on the screen.

Step 4: Make the Columns Look Good

- Move your mouse to the space between the two columns.. Hold the mouse button then drag the divider to the left. This will give the chart space.
- Now your columns look good.

Step 5: Touches

Heritage Treasures: An In-Depth Analysis of UNESCO World Heritage Sites in Tableau

- Look at the color legends on the side of the screen. Click on each one. Remove it from the dashboard if you don't need it.
- If any of the chart titles don't look good double-click, on them. Change the text. Now your Danger Analysis Panel is ready.
